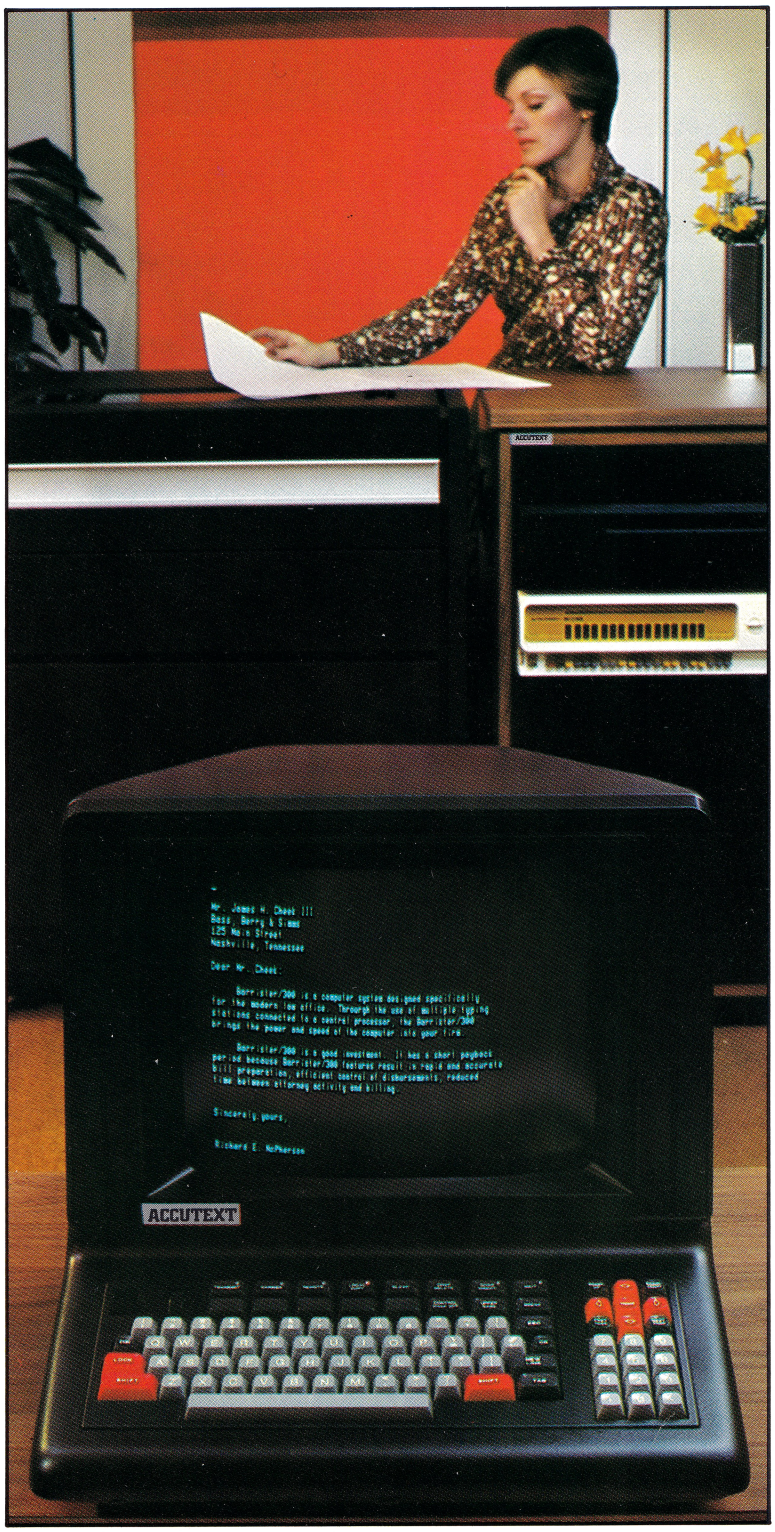
ACCUTEXT Administrative Information System

High Power Word Processing in Your Office

ACCUTEXT is a computer based, shared logic administrative information system which your staff uses to produce documents quickly, accurately and economically.



ACCUTEXT Features

- Data Entry and Edit
- Massive Disk Storage Capability
- Instantaneous Access to Documents
- Blocked Paragraphs
- Automatic Table of Contents
- Page Numbering
- Hyphenation by Rules and Dictionary
- Right Margin Justification
- High Speed Automatic Printer Support
- Visual Display Terminals (CRT's) with Cursor Editing
- Global Editing
- Multiple Column
- Footnoting
- Financial and Statistical Typing (decimal tabulation, arithmetic capabilities)
- Password Protection

ACCUTEXT Applications

- Mail List Management
- Photocomposition
- Automatic Continuous Form Letter Writing
- Full Text Search and Retrieval
- Sort Package Capability

ACCUTEXT
Word Processing Stations

ACCUTEXT is a multi-terminal system with up to 16 word processing stations. Work stations function independently of each other.

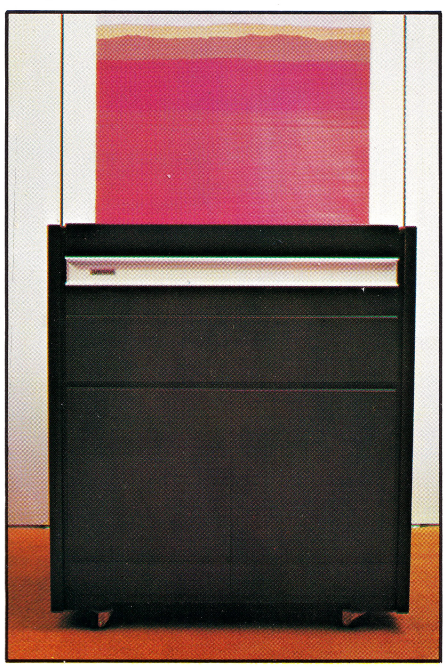
The word processing stations consist of a 45 character per second typing terminal or a visual display unit or both. Standard typewriter keyboard and large display characters make the work stations easy to use.

The system's speed and editing power permit production of new or standard documents economically. New documents are rapidly entered through the keyboard. To edit, a secretary simply retrieves the document from the storage disk by name and immediately begins to edit by typing in corrections.

ACCUTEXT
Disk Storage Units

Massive on-line storage for typed documents is provided with disk storage capable of holding from 2,000 to over 140,000 pages of information. Archive packs provide unlimited off-line storage.

ACCUTEXT
High Speed Line Printer



Rapid production of text drafts for proofreading and revision are easily provided with final copy from upper/lower case printers produced at speeds ranging from 200 to 730 lines per minute.

ACCUTEXT
Optical Word Reader

When used with the system, the optical word reader allows documents to be prepared throughout the office and entered directly into the computer at 200 characters per second.

ACCUTEXT Administrative Information System

High Power Word Processing in Your Office

ACCUTEXT is a computer based, shared logic administrative information system which your staff uses to produce documents quickly, accurately and economically.

Mr. G. Maybell
Typewriter Res.
207 West 106 St.
New York, NY 10025

Dear Mr. Maybell:

Thank you for your inquiry concerning Comptek Research, Inc.'s ACCUTEXT*.

ACCUTEXT is a full capability office information system designed to enable your current staff to produce documents quickly, accurately and economically. ACCUTEXT brings the power of a minicomputer to your secretary's fingertips through the use of simple edit, search and retrieval commands which are entered into ACCUTEXT word processing stations.

ACCUTEXT is composed of a minicomputer, large disk storage units, hard copy work stations and/or visual display terminals, and optional equipment such as a line printer and optical word reader. ACCUTEXT offers the flexibility of adding or updating equipment as your office needs change.

The basic ACCUTEXT system is modular and each system is configured to meet the needs of a specific installation. A small system can be purchased from as low as $29,000, with a large system running to over $200,000. If your office has the need for computer power in document preparation, mail list management, photocomposition, or data entry and editing, you will find ACCUTEXT to be a cost effective solution.

If you would like additional information, please contact me.

Sincerely,

S. J. Lonowitch

Samuel J. Lonowitch
